## Waxing Aftercare

### Aftercare tips

#### **Please note:**

Some slight soreness, small bumps and redness are common and perfectly normal temporary reactions, particularly if this is your first wax. These symptoms should subside over the next 24 - 48 hours. If you experience persistent redness or irritation, or if you have any questions, please do not hesitate to contact us. Keep the waxed area clean and avoid heat and friction during the next 24 - 48 hours.

#### **This means:**

- No hot baths or showers (cool to lukewarm water only).
- No saunas, hot tubs, massage or steam treatments.
- No tanning (sunbathing, sun beds or fake tans).
- No sport, gym work or other exercise.
- Avoid scratching or touching the treated area with unwashed hands.
- Wear clean, loose fitting clothes.
- Avoid swimming in chlorinated pools.
- Do not apply deodorants, body sprays, powders, lotions or other products to the area, other than those recommended by your therapist.
